

ZeroTP enjoy¹⁰ GMP

Low content of Tyrosine (Tyr) and Phenylalanine (Phe).
From 3 years of age.

General description:

ZeroTP enjoy¹⁰ GMP is a concentrated protein supplement in powder form – based on the milk protein glycomacropeptide (GMP) – for the nutritional management of Tyrosinemia (TYR). It presents a residual content of Phenylalanine (Phe) and Tyrosine (TYR) deriving from the natural raw material. Suitable from 3 years of age, for teenagers and adults. GMP is the natural protein source in ZeroTP enjoy¹⁰ GMP. During the process of cheese making through rennet clotting this peptide is released from casein and passes into the liquid whey. From there it is isolated and purified by means of special technological processes.

Available in neutral flavour. Once prepared, ZeroTP enjoy¹⁰ GMP is a drink with a very pleasant taste, resembling a regular vegetable milk, with the consistency of a milkshake. It tastes better than the typical synthetic amino acid formulas, and therefore there is a better acceptance and continuation of dietary treatment by children, teenagers and adults with TYR.

Presentation and Protein Equivalent (PE):

ZeroTP enjoy¹⁰ GMP is packed in convenient portion sachets of 10 g PE. Each box contains 25 sachets of 16.5 g (412, 5 g in total).

Important information:

ZeroTP enjoy¹⁰ GMP must only be used under medical supervision. Not for use as a sole source of nutrition. For enteral use only.

Dosage and Administration:

The daily total amount of protein supplements (GMP-based and/or amino acid mixture) depends on age, body weight and individual medical condition, and should be determined by a medical specialist. The daily dosage should be divided into 3 - 5 single portions. The daily dose of protein supplements may consist either exclusively of ZeroTP enjoy¹⁰ GMP or of a combination of other products suitable for the nutritional management of TYR. The diet must be supplemented with energy, natural protein and other nutrients in prescribed quantities.

Preparation:

Fill drinking water into a shaker, empty 1 sachet of ZeroTP enjoy¹⁰ GMP into it, and shake it. Recommended amounts: Add 1 sachet of ZeroTP enjoy¹⁰ GMP to 80-100 mL of water (10 g PE). Can also be prepared with more or less water, as requested. Always prepare it freshly.

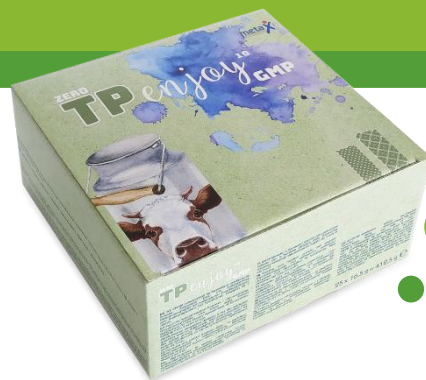

Storage:

Keep it in a cool, dry place. Once opened, consume the entire sachet content.

Product 	Treatment of 	Presentation and PE 	Age 	Preparation 
ZeroTP enjoy ¹⁰ GMP	TYR 	Protein supplement in powder form. Each box contains 25 sachets (10 g EP)	From 3 years of age	1 sachet of ZeroTP enjoy ¹⁰ GMP + 80-100 mL of water – shaker

ZeroTP enjoy¹⁰ GMP

Low content of Tyrosine (Tyr) and Phenylalanine (Phe).
From 3 years of age.

Nutrition Information:

Supplemented with highly purified L-amino acids Alanine, Arginine, Aspartic acid, Glutamic acid, Glycine, Histidine, Leucine, Lysine and Tryptophan. Some indispensable and conditionally indispensable amino acids (e.g. Arginine, Histidine, Leucine and Tryptophan) are not or almost not present in GMP, the natural protein source in ZeroTP enjoy¹⁰ GMP. These amino acids are added to ZeroTP enjoy¹⁰ GMP, making it a protein supplement with high biological value. It also contains vitamins, minerals, carbohydrates, fibre, and micronutrients in adequate amounts.
